Santa Fe, N. M., Aug. 12.—Attorney general Frank W. Depositor's Guaranty Law Wins

In United States Circuit Court of Appeals

During the year 1909 the States of Texas, Nebraska and Kansas, following the pace set by Oklahoma, passed laws for the Guaranty of Bank Deposits.

Before the law could be made effective in Kansas, a suit was brought to restrain the Bank Commissioner from carrying out the provisions of the law.

The National organizations bringing this suit claimed that, as the law did not allow them equal rights with the State Banks it was a discrimination against them, AS DEPOSITORS WOULD NATURALLY PREFER THE BANKS WHERE DEPOSITS WERE GUARANTEED.

This case reached the United States Circuit Court of Appeals and was decided by that tribunal on May 20th, 1910, and the law was in every particular upheld and sustained.

And so the will of the people has prevailed and the law has been vindicated.

This decision has greatly discouraged those who oppose the Guaranty Plan; they have placed their trust in the unconstitutionality of the law.

Vain hope. The guaranty plan has come to stay and the recognition by the National institutions in the suit, that "depositors would naturally prefer the banks where deposits were guaranteed" is the greatest compliment that has been paid to the effectiveness of the plan.

The people called for the protection given by the law and what the people demand they must and will have.

The people's demand for Depositor's Guaranty Laws has been heeded, and the people will certainly Prefer the Banks where Deposits are Guaranteed.

We, as a Guaranty Fund Bank, offer you such protection and cordially invite your account.

Million Confirmed Drunkards in U. S. One-third of Them Die Every Year and Ranks Keep Full.

Philadelphia, April 8.—One million persons in this country are confirmed inebriates. Of this number one-third die yearly as a result of drink, yet this number is annually made up by recruits of the army of drunkards.

This was the substance of a paper read by Dr. DeLancy Carter, of the New York Medical Society for the study of alcohol and other narcotics.

This problem, he asserted, exceeds in sociological importance anything known to modern civilization. He urged institutions for their treatment, lectures, educational efforts and every legal method of restraint that can possibly check the influx of new drunkards.
